

## THE ENCOUNTER

PASSANNA IKKALY

We are part of a confederation that is in charge of lifting psychic structures. From the antiquity we have infused the star earth energy patterns, those that have been received with a minimum of integration and a lot of reaction and resistance. This demonstrates us like it will be a form of behaving in the coming days. Not we see a change in the result. The only change is our support, the help to those that serve the Light. The man only has to take the first step, want it, and we will be there to help him. We hope this infusion allows the man to express this feel presently.

We are the manifested energy of the federacional council of north Pleiades and we guard the electronic sphere of alliances for the peace and preservation of the life in the cosmos.

We visualize the strong threat of a shock of the terrestrial axis in your generation. An event of this nature would create a situation of the sphere in which nobody could survive.

Another manifestation for which is required to amplify your world frequency is for the magnetism of an asteroid inside your own magnetic field or traffics of another solar system. This would interrupt and it would perturb your own system and

energy field to the point that all the inhabitants of the planet would extinguish.

If you make echo to the negativity you could magnetize toward the same realization of these events.

The dangers that threaten the sphere are extremely real; the resulting tragedy for the humanity is serious and unavoidable. However there is in this order 11 federations ready to support all that requests this action with vibrant voice.

Occasionally the terrestrial sphere has been intervened by voluntary technical cosmonauts of the stars that vibrate in the frequencies 7-12, this to avoid that the irradiation of the subjective axis irradiates to the neighboring stars. Beings of cosmic advanced science but that at the same time they flow with the permits of sacred laws.

Occasionally we have prosecuted your imagination toward the illumination and internal revaluation; this through the astral world, but few perceives it and day by day they is less people that attend the instructions that are imparted in the superdimensionals states where one lives the Truth and the respect for the celestial principles.

With spiritual license we have dared to descend our ships to your frequencies in a visible way, as well as to expose us in vulnerable situations to convince the souls on the Earth of our presence. Now we are forced to advance some more steps for the brevity of the time and of the dangers that watch and the pressure of the events that are to happen.

This call travels through the space from 1.247 years. We arrive once again to you with our call and our warning, but this time we unveiled our most secret strategy to sound the alarm, that this is truly the hour of the decline. Now it is the time to make an inventory of the internal values. It is hence that we have determined to expose our plans to go to the light and to send proof of our presence and existence in the Earth, silencing the negative arguments forever regarding our protection.

This Verb is not for the great majority but for those who were correspondents. Most important it is even that later on those that have not been taken will know why. That all study and understand this reality in the being's internal levels. Have present that the mermaids mamtralizing are.

It is time of war in the star earth, seemingly nobody wants it, each one lives their public existence forgetting the internal, life that only some few ones want believing that they will be able to take out a benefit of the external thing.

NEFFING IKKALY
